

NBN Fact Sheet

Approximately 50% of users have not made the transition to the NBN.

Everything connected to or delivered via the old copper network will be cut off.

Once notified of NBN availability in your area, you have 18 months to make the switch.

If you want to keep receiving a fixed-line internet service, you'll need to switch over to the NBN or a Fibre connection.

You may also need to upgrade your old phone systems so start planning for this now.

Enabling Opportunity, Realising Potential
